

LION Smart GmbH is an innovative engineering service company for electric energy storage and battery system technology. The company develops battery packs, battery management systems and together with TÜV SÜD Battery Testing GmbH operates test facilities and laboratories for electric storage devices.

## Intern / Working Student in the field of Battery System Testing

### Your main tasks:

Our research and development projects frequently raise interesting issues and questions (electrical, thermal, mechanical, ...), which must be investigated experimentally. We are looking for committed students to support the planning, execution, evaluation and documentation of these experiments.

### Your profile:

- You are enthusiastic and convinced of the possibilities of electrochemical energy storage
- You are enrolled in a technical course (suitable for Bachelor's students) and may already have some experience in testing and/or battery systems
- You want to contribute to an efficient and sustainable energy industry
- You enjoy interdisciplinary work, are self-reliant and enjoy working in a team

### What we offer:

We at LION Smart are enthusiastic about electric mobility and proud to be working in a future oriented industry. You will work in an international and ambitious team of enthusiasts from different backgrounds. Flat hierarchies make for speedy decisions and allow you to contribute your own ideas and actively participate in the development process. You will gain insight into other company divisions and work across departments. We stand out for our familiar communication culture, a collegial working atmosphere and flexible working hours.

### Did we spark your interest?

Then we look forward to receiving your application including your desired salary and earliest possible starting date.
